

Create git repo and vhost on apache/Nginx and create the following design

https://cdn.statically.io/gh/TheOdinProject/curriculum/81a5d553f4073e593d23a6ab00d50eef8620796d/foundations/html_css/project/imgs/01.png

https://cdn.statically.io/gh/TheOdinProject/curriculum/81a5d553f4073e593d23a6ab00d50eef8620796d/foundations/html_css/project/imgs/02.png

Please do all commits in git from the start. Repo without commits or fewer commits is suspicious repo

Make sure the design works well on the Desktop and mobile.

Add a screenshot of your local page with the URL visible in the git repo

Add any other things in the readme file.

Submit your git repo [here](#)
